Funktionale Anforderungen

Moving a figure

Requirement ID	1
Requirement Name	"Select a figure"
Requirement description	As a plyer I want to be able to select a figure. When a figure is selected, on the possible fields where it can move a transparent circle has to appear and the field of the figure needs to be covered with a transparent yellow color.
Type of requirement	Funktion
Priority	high
Status	Not implemented

Requirement ID	2
Requirement Name	"Unselect a figure"
Requirement description	As a player I want to be able to unselect a figure. When a figure was selected and is clicked again, the circles on the possible fields where it can move have to disappear.
Type of requirement	Funktion
Priority	high
Status	Not implemented
